

Define Problem Statements

Date: 29 September 2026 **Team ID:** SWTID-2026-4886

Project: AnswerBot – AI-powered FAQ and Customer Support Automation

Problem Statement

Customer support teams and content administrators often handle repeated questions manually, maintain FAQs separately, and spend time drafting consistent answers. This creates delays, duplicated effort, and difficulty keeping support knowledge organized.

Who experiences the problem?

- Customer support operators managing repetitive inquiries.
- Administrators maintaining FAQ knowledge bases.
- End users who need quick and consistent answers.

Root causes

- Manual FAQ creation and updates.
- Knowledge scattered across documents or systems.
- No integrated AI assistance for drafting answers and FAQs.
- Insufficient access control for protected FAQ operations.

Impact

- Higher response effort for repetitive questions.
- Slower content maintenance.
- Inconsistent wording and reduced discoverability of support information.
