Project: AnswerBot – AI-powered FAQ and Customer Support Automation

Layer	Technology	Purpose / Justification
Client / API Client	Postman / Thunder Client	Used to invoke and verify REST endpoints.
Backend	Node.js + Express.js	Lightweight server runtime and routing for REST APIs.
Database	MongoDB Atlas + Mongoose	Flexible document storage with schema validation and ODM support.
Authentication	JWT + bcrypt	Stateless authorization and secure password hashing.
AI Integration	Google Gemini SDK	Generative AI for answer generation and FAQ generation.
Configuration	dotenv	Loads environment variables and keeps secrets out of source.
Development	VS Code + npm	Project development and dependency management.
Testing	Postman / Thunder Client	Endpoint and response verification.

Primary language: JavaScript. The project is backend/API focused; no separate frontend framework is required for the core submission.
