Project: AnswerBot – AI-powered FAQ and Customer Support Automation

Customer Segments

- Customer support operations teams
- FAQ / knowledge-base administrators
- End users consuming support information

Problems / Pains

- Repeated questions and manual drafting
- Difficult FAQ organization and search
- Need for controlled access to content

Triggers

- High volume of repetitive queries
- Need to create or update FAQ content quickly

Available Solutions

- Manual documentation
- Static FAQ pages
- Generic chatbots without structured FAQ management

Customer Limitations

- Limited time and technical resources
- Need for simple API-based integration

Root Cause

- FAQ management and AI assistance are not integrated into one controlled workflow

Behavior / Channels

- Users search FAQs through an application/API; administrators use API clients to manage records

Your Solution

AnswerBot combines secure authentication, persistent FAQ management, search, and Google Gemini-powered answer/FAQ generation in one REST API.
