

Proposed Solution

Date: 29 September 2026 **Team ID:** SWTID-2026-4886
Project: AnswerBot – AI-powered FAQ and Customer Support Automation

Project Overview

AnswerBot is a secure REST API for FAQ management and AI-assisted customer support. It separates authentication, FAQ management, AI services and persistence so a web or mobile frontend can be connected later.

Objective

- Reduce repetitive support drafting effort.
- Centralize FAQ records and search.
- Provide secure authenticated content management.
- Use generative AI to draft answers and FAQ pairs.

Scope

- User registration/login
- FAQ CRUD and search
- JWT-protected routes
- AI answer generation
- AI FAQ generation
- MongoDB persistence
- JSON-based REST API

Key Features

- JWT authentication
- bcrypt password hashing
- FAQ create/read/update/delete
- FAQ search and category handling
- Gemini-powered AI answers
- Gemini-powered FAQ generation
- Centralized error handling

Resource Requirements

Resource	Requirement
OS	Windows / macOS / Linux
Runtime	Node.js 18+
Memory	8 GB recommended
Database	MongoDB Atlas or MongoDB
Tools	VS Code, npm, Postman/Thunder Client
