

Code Layout, Readability and Reusability

Date: 29 September 2026 **Team ID:** SWTID-2026-4886
Project: AnswerBot – AI-powered FAQ and Customer Support Automation

Parameter	Status	Remarks
Consistent indentation	Yes	JavaScript files follow consistent formatting.
Proper file structure	Yes	Routes, controllers/services, models, middleware and server files are separated.
Meaningful variable names	Yes	Names describe request, response, FAQ, user and authentication roles.
Function/method names	Yes	Route handlers and service functions are purpose-oriented.
Code comments	Partial	Comments are used where useful; structure itself provides most context.
Modular design	Yes	Authentication, FAQ and AI routes are separated.
No redundant code	Yes	Common middleware and database logic are reused.
Error handling	Yes	Critical API/database/AI failures return controlled responses.

Reusable Components / Modules

Component	Where Reused	Level
JWT protect middleware	All protected FAQ/AI routes	High
Mongoose models	User and FAQ persistence operations	High
Express routers	Auth, FAQ and AI route groups	High
Environment configuration	Database/API key/server settings	High
Central error handling	API failure paths	Medium
