

Performance Testing

Date: 29 September 2026 **Team ID:** SWTID-2026-4886
Project: AnswerBot – AI-powered FAQ and Customer Support Automation

Performance Testing Note

No formal load-testing benchmark was captured in the available project evidence. Therefore, numerical response-time, throughput, CPU and error-rate claims are intentionally not fabricated.

Field	Details
Testing Tool Used	Postman / Thunder Client for functional API verification; no formal load tool claimed.
Type of Testing	Functional/API verification; formal load/stress testing not recorded.
Target Modules	/api/auth, /api/faqs, /api/ai
Environment	Local development + MongoDB Atlas
Test Date	September 2026

Test Scenarios

#	Scenario	Users	Expected Outcome
1	Register and login	1	Valid JSON response and JWT on login
2	Create and retrieve FAQ	1	FAQ stored/retrieved correctly
3	Search FAQ	1	Matching FAQ records returned
4	AI answer / generate FAQ	1	Gemini response returned when credentials/configuration are valid

Measured Metrics

Metric	Target	Recorded Result
Average response time	< 2 sec	Not formally measured
Maximum response time	< 5 sec	Not formally measured
Throughput	Document actual result	Not formally measured
Error rate	< 1%	Not formally measured
CPU utilization	< 80%	Not formally measured
